## DETAILED ACTION

### *Claim Objections*

1. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 1 already recites that the tabular base is impregnated with silica gel. It is unclear how claim 2 is further limiting by reciting that compressing particles of silica gel into tabular form forms the tabular base. Further clarification is required.
2. Claim 5 is objected to because of the following informalities: Claim 5 contains what appears to be a typographical error. Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 1 recites the limitation "the gas reaction zone" in line 3. There is insufficient antecedent basis for this limitation in the claim.
3. Claim 1 recites the limitation "the solvent" in line 5. There is insufficient antecedent basis for this limitation in the claim.
4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See

Art Unit: 1743

MPEP § 2172.01. The omitted elements are: an explanation of the significance of the "gas reaction zone."

5. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites that the base material comprises a sheet formed by "depositing from a mixture of fibers & silica gel particles." Depositing what? It is unclear what applicant intends in this claim. Further clarification is required.
